

Guide to writing a Lamicolor/Pfleiderer Specification – including Duropal Quadra/Streamline Bench Top and Splashbacks

Being that our product is growing at such a rapid rate in the market place. We thought it best to supply a guide of how to best describe our products with-in an initial specification of a project. The more information that can be offered about the product at even the initial costing stage can prevent any confusion at the trade level (re; confusion between our product and Melamine board, at the initial costing stage when being priced by the joiner). We have had a number of Architects and Interior Designers requesting this. We hope this is found useful.

Application	Product	Substrate	Colour	Finish	Supplier	Contact	Project Pricing
